

Bella

by 

DESIGNED MANUFACTURED

AND SUPPORTED IN THE USA

Adapting to each person's abilities and pace, Bella provides a comfortable, distraction free solution to understand keyboard layouts and learn typing skills with no need for a computer, internet or monitor.

From easy setup and documentation to natural sounding voice feedback, Bella empowers Users to challenge themselves as they discover an independence in learning. A simple spoken menu system guides Users through modes and information, all based off the Escape Key.

Bella has four modes that can be progressively used to learn the landscape and location of keys on a Computer-Based keyboard:

- 1) *Key Mode* announces each key as you press it
- 2) *Word Mode* announces a word after you type it
- 3) *Sentence Mode* announces a sentence after you type it
- 4) *Game Mode* is an interactive way to engage and improve your skills

Enhancing typing skills is only the starting point for Users and their Care Givers.

Bella also...

- eases the progression to using a computer
- opens opportunities for education and employment
- can be a tool that Teachers use to assess Students skills as part of an I E P
- compliments English as a Second Language curriculum
- works alongside Trainers to assess skills of people with visual, physical or cognitive disabilities
- sharpens memory and encourages community activity of Assisted Living and Nursing Home Residents
- inspires self-confidence, pride, determination and a greater quality of life!!!

About EVAS

In 1979 Jerry and Cathy Swerdlick established Jerry's at Misquamicut, Inc., dba Electronic Vision Access Solutions (EVAS) as a family run, privately held corporation. Through the years, EVAS expanded from a small room in the Swerdlick's home to a 10,000 square foot facility in Westerly, Rhode Island. Sara Saint Jean, Jerry and Cathy's daughter, continues the family tradition of managing the company and supporting the disabled community.

EVAS is a Services and Technology Solutions Provider dedicated to helping people with disabilities thrive everyday by offering accessible Computers, tablets, smartphones and Assistive Technology products - all backed by our exceptional Customer Service, Production and Technical Support Teams that are driven to meet and exceed the needs of our Customers with compassion, respect and advocacy.
